

**We need YOU to solve the hardest national security and defence problems.**

In this class you will be one of 4-5 teammates learning and applying Silicon Valley Lean Startup Methods to solve real world national security and defence problems in a fast-paced and exciting environment

## WHY BE A **H4MOD** STUDENT?

high quality and novel experience

build and expand your professional networks

opportunity to form start-ups around solution ideas

12 students in 2023 selected for MoD work placement

develop employability skills to enable you to compete in the job market

work on a real world national security and defence problem alongside an MoD problem sponsor and industry mentor

learn entrepreneurship through application to real problems

# WHAT CAN YOU EXPECT ON THE H4MoD COURSE?

## CORE FEATURES OF THE COURSE

This course simulates what it is like to start up a company - it will be fast paced with considerable ambiguity and uncertainty. We often hear from students that *"this was the hardest class I took at university, but also the best"*.

Expectations include:

- Weekly interaction with senior leaders
- 10 interviews per week
- Weekly presentations to the class on your findings

The opportunities at the end of the course depend on you and your team. For example, one of our student teams has gone on to form a startup company around the dual use solution they developed on the course.

## DEVELOP YOUR EMPLOYABILITY SKILLS

- Interview techniques
- Teamwork
- Presentation skills + Public speaking
- Experience with Lean Startup Methods
- Complex problem-solving
- Data analysis

# STUDENT TESTIMONIALS

"The course built some amazing skills; leadership, teamwork, consultancy, problem solving, and confidence. This was necessary for us prior to stepping in our professional careers."

Muhammad Maaz Nasir,  
University of Glasgow,  
Spring 2023

"The H4MoD course was one of the highlights of my Masters degree. Going out there, interviewing as many people as we did, giving weekly presentations and getting feedback on each of these really taught me in a faster and more efficient manner. I'd highly recommend it to anyone considering taking part in the course!"

Sajini Sivanandan,  
Imperial College  
London, Spring  
2023

# WHO WE ARE

CMP is a unique educational charity that brings innovative education for the leaders of tomorrow, to solve the critical problems of today. We harness the power of academia, government, and industry to address pressing societal challenges.

Renowned for our exclusive 'Hacking for' (H4) programmes, CMP breathes innovation into the heart of academia and defence, cultivating an exhilarating learning environment for future leaders. We do this by delivering Mission-Driven Entrepreneurship™, a model of merging the speed of start-ups with the drive of real-world problem solving.

It's time to become the catalyst for a movement that places real-world problem solving at its core and empowers future leaders. Be part of the change and help us shape a better world for the generations to come.
